Animal and Plant Health Inspection Service

[Docket No. APHIS-2012-0004]

Notice of Decision To Authorize the Importation of Fresh Barhi Dates From Israel

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public of our decision to authorize the importation into the United States of fresh dates of the cultivar Barhi from Israel. Based on the findings of a pest risk analysis, which we made available to the public for review and comment through a previous notice, we believe that the application of one or more designated phytosanitary measures will be sufficient to mitigate the risks of introducing or disseminating plant pests or noxious weeds via the importation of fresh dates of the cultivar Barhi from Israel. In addition, based on the findings

of a treatment evaluation document, we are advising the public of our decision to add a treatment schedule for *Ceratitidis capitata* in Barhi dates to the Plant Protection and Quarantine Treatment Manual.

DATES: *Effective Date:* May 2, 2013.

FOR FURTHER INFORMATION CONTACT: Mr. Marc Phillips, Senior Regulatory Policy Specialist, Regulatory Coordination and Compliance, PPQ, APHIS, 4700 River Road, Unit 156, Riverdale, MD 20737-1236; (301) 851-2114.

SUPPLEMENTARY INFORMATION: Under the regulations in "Subpart—Fruits and Vegetables" (7 CFR 319.56-1 through 319.56-58, referred to below as the regulations), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture prohibits or restricts the importation of fruits and vegetables into the United States from certain parts of the world to prevent plant pests from being introduced into and spread within the United States.

Section 319.56-4 of the regulations contains a performance-based process for approving the importation of commodities that, based on the findings of a pest risk analysis (PRA), can be safely imported subject to one or more of the designated phytosanitary measures listed in paragraph (b) of that section. Under that process, APHIS publishes a notice in the **Federal Register** announcing the availability of the PRA that evaluates the risks associated with the importation of a particular fruit or vegetable. Following the close of the 60-day comment period, APHIS may authorize the importation of the fruit or vegetable subject to the identified designated measures if: (1) No comments were received on the PRA; (2) the comments on the PRA revealed that no changes to the PRA were necessary; or (3) changes to the PRA were made in response to public comments, but the changes did not affect the overall conclusions of the analysis and the Administrator's determination of risk.

In accordance with that process, we published a notice¹ in the **Federal Register** on January 9, 2013 (78 FR 1825-1826, Docket No. APHIS-2012-0004), in which we announced the availability, for review and comment, of a PRA that evaluates the risks associated with the importation into the United States of fresh dates (*Phoenix dactylifera* L.) of the cultivar Barhi (referred to below as Barhi dates) from Israel.
